Used by the most trusted names in supply chain

## REDUCE COST OF INVENTORY ACCURACY

- ✓ Count up to 1,500 pallets/hr in temperatures as low as -20°F and in aisles as narrow as 4.5 ft
- ✓ Identify and fix inventory errors for 99.9% inventory accuracy
- ✓ Scan the inventory locations that matter

## BOOST REVENUE

- ✓ Improve on-time fulfillment and delivery
- ✓ Reduce shrinkage
- ✓ Build confidence with clients and stakeholders

## IMPROVE PRODUCTIVITY

- ✓ Focus team on solving real-time problems, not on re-verifying accurate information
- ✓ Reduce mispicks, fulfillment delays, and partial shipments
- ✓ Find and fix inventory errors from your desk

## PROVEN RESULTS

**1-2 lost pallets**  
down from 10-20 per day

**90% decrease**  
in case counting labor

**Omni-channel Retailer**

**>\$5 Million**  
inventory found

"At one facility, our U.S. team saw a 5X increase in productivity—from 800 counts in one day with four manual counters to 1,200 scan locations utilizing one teammate and drones—and was able to redeploy labor to value-adding activities."

Marie-Christine Lombard,  
CEO, Geodis

"Our customer absolutely loves the Gather AI solution. We've been able to get 99.995% accuracy with over 500,000 LPs."
