

The Inventory Intelligence Solution

New! Automated monitoring in cold storage and freezer

Gather AI's warehouse automation technology is purpose-built for inventory accuracy and real-time insights. Now announcing our expansion to freezer and cold storage warehouse environments.

Gather AI is trusted by leading 3PLs and distribution partners

AUTOMATE DATA VISIBILITY IN COLD STORAGE ENVIRONMENTS

- ✓ Gather AI's drone automation can fly in -20°F
- ✓ Reduce the time staff spends in challenging conditions
- ✓ Realize the full benefits of traceability & digital twin visualization

REDUCE COST OF INVENTORY ACCURACY IN ANY ENVIRONMENT

- ✓ Reduce shrink with automated monitoring inside the freezer
- ✓ Find and fix inventory errors from the comfort of your desk
- ✓ Count up to 900 pallets/hour

IMPROVE OPERATIONAL EFFICIENCY IN THE FREEZER

- ✓ Data insights ensure FIFO compliance to guarantee freshness
- ✓ Monitor inventory age to reduce waste from expired items
- ✓ Reduce mispicks, fulfillment delays, and partial shipments

AN INDUSTRY-FIRST

"If you can case count, and do it in the freezer, that would be a game changer."

Fortune 500 Global Food Company

"If you're struggling to fill jobs in your refrigerated spaces, reduce your cost per pick/pallet, there's never been a better time to add automation to the equation."

Our Mission = Happy Customers

"In multiple GEODIS U.S. campuses, the teams are using Gather AI software, a technology solution that enables them to scan warehouse inventory faster with autonomous drones, tremendously reducing the time and resources needed to complete cycle counts while increasing data visibility. At one facility, our U.S. team saw

a 5X increase in productivity—from 800 counts in one day with four manual counters to 1,200 scan locations utilizing one teammate and drones—and was able to redeploy labor to value-adding activities."

Marie-Christine Lombard
CEO, Geodis
